

# VO PHUOC NHAT

Financial Data Analyst | Market Data Automation, ETL & BI Reporting

Thu Duc City, HCMC | [nhat.vophuoc@gmail.com](mailto:nhat.vophuoc@gmail.com) | (+84) 384 792 943 | [phuocnhat.dev](https://phuocnhat.dev) | [github.com/phuocnhat1011](https://github.com/phuocnhat1011)

## PROFESSIONAL SUMMARY

Financial Data Analyst with 2 years of experience in Vietnamese securities market data, specializing in market data automation, financial time-series processing, data quality validation, and trading-related analytical workflows. Skilled in R, Python, SQL basics, and Power BI, with hands-on experience collecting data from market APIs, cleaning and structuring datasets, supporting rule-based stock screening workflows, and building reporting-ready outputs and dashboards for market monitoring and analysis.

## TECHNICAL SKILLS

|                   |                                                                                                                 |
|-------------------|-----------------------------------------------------------------------------------------------------------------|
| Programming       | R, Python, SQL basics                                                                                           |
| Data / ETL        | pandas, data.table, dplyr, requests / http, jsonlite, API extraction, data cleaning, transformation, validation |
| BI / Analytics    | Power BI, DAX, Power Query, dashboard design, KPI reporting, ad-hoc analytical outputs                          |
| Finance / Markets | Vietnamese securities market data, financial time-series, sector analysis, stock screening, trading signals     |
| Platforms         | RStudio, VS Code, Git, SQL Server, Navicat                                                                      |
| Language          | English – B2                                                                                                    |

## EXPERIENCE

Junior Financial Data Analyst | BeQ Holdings

Oct 2024 – Present

- Developed and maintained automated R/Python workflows to collect, clean, validate, and update Vietnamese securities market data from SSI, Yahoo Finance, and internal data sources.
- Processed financial time-series datasets for stock screening and trading-related workflows, including ticker standardization, trading date validation, missing value handling, duplicate checks, and abnormal data detection.
- Built and deployed an automated VN30F1M intraday hedging system in R, using Grid Search backtesting to optimize parameters and State Machine logic for real-time SSI FastConnect API order execution.
- Prepared screening-ready market data outputs for internal rule-based stock selection workflows, ensuring clean, structured, and up-to-date datasets for downstream analysis and system use cases.
- Created ad-hoc analytical dashboards and reporting-ready outputs using R/Python and Power BI, including sector-level stock comparisons, price movement tracking, liquidity monitoring, trading signal summaries, and watchlist-ready datasets for internal review.
- Designed internal monitoring dashboards using echarts4r to visualize candlestick patterns, entry/exit signals, and system status; integrated Discord Webhooks for real-time data quality and anomaly alerts.
- Developed automated R functions to load processed market datasets into relational databases managed via Navicat, ensuring data availability for front-end, monitoring, and analytical workflows.

Financial Data Analyst Intern | BeQ Holdings

Aug 2024 – Oct 2024

- Cleaned and standardized financial time-series data in R and Python, including outlier detection, noise filtering, missing value handling, and dataset validation for analytical use cases.
- Assisted in preparing structured market data tables to track selected stocks, price movements, trading signals, and daily performance changes, supporting internal monitoring and data review workflows.

Investment Consulting Intern | FPT Securities

Sep 2023 – Dec 2023

- Supported advisors in preparing daily market reports and client investment recommendations using fundamental and technical analysis of Vietnamese equities.
- Monitored price movements and trading signals for a watchlist of 20+ stocks; summarized key findings into structured briefings for senior advisors.

## PERSONAL PROJECTS

Market Overview & Financial Statement Data Model | Personal Project

2025 – 2026

- Automated financial statement collection for 37+ securities firms via Python (Selenium, Requests), scraping balance sheet / income statement / cash flow from SSI iBoard across multiple reporting periods into a structured local directory.
- Cleaned and standardized raw Excel reports in Pandas (batch merge, unpivot, multi-year accounting rename resolution); modeled into a Star Schema in PostgreSQL (Fact: financials; Dimension: company, period) with PK/FK constraints.
- Extracted FVTPL/AFS portfolio data from PDFs via Python OCR; validated accuracy via automated sum-checks against reported totals, with LLM-assisted re-extraction for flagged mismatches.
- Built a Power BI dashboard (connected to PostgreSQL) with drill-down across 3 statement types and dynamic slicers by firm and period for cross-firm FVTPL/AFS portfolio comparison.

## EDUCATION

Bachelor of Banking and Finance | Open University Ho Chi Minh City

2020 – 2024
