

VO PHUOC NHAT

Junior Financial Data Analyst

District 9, HCMC | nhat.vophuoc@gmail.com | (+84) 384 792 943

PROFESSIONAL SUMMARY

Junior Financial Data Analyst with 1.5+ years of experience processing and analyzing financial market data for Vietnamese securities markets. Proficient in R, Python, SQL, and Power BI across data collection, validation, and reporting workflows.

TECHNICAL SKILLS

Programming	R, Python, SQL
Analytics & BI	Power BI, DAX
Libraries & Tools	data.table, httr, jsonlite, pandas, Git
Platforms	RStudio, SQL Server, Navicat, VS Code
Language	English – B2

EXPERIENCE

Junior Financial Data Analyst | BeQ Holdings Oct 2024 – Present

- Automated data collection and validation from multiple market sources (SSI, CafeF, Vietstock, Yahoo Finance) in R, producing a clean unified dataset for analysis and reporting.
- Built a multi-device workflow with file-based task coordination to prevent duplicate ingestion and database write conflicts.
- Set up data quality monitoring for missing values and anomalies; integrated Discord Webhook alerts for delayed or abnormal table updates.
- Wrote SQL queries using CTEs and window functions (ROW_NUMBER, LAG/LEAD, rolling aggregates) to track price changes and rank tickers by volume in SQL Server.

Financial Data Analyst Intern | BeQ Holdings Aug 2024 – Oct 2024

- Cleaned and standardized financial time-series data in R and Python, including outlier detection and noise filtering; validated datasets to support financial reporting and dashboard development.
- Assisted in building data tables to track portfolio holdings and daily P&L movements across asset classes, supporting internal investment performance reviews.

Investment Consulting Intern | FPT Securities Sep 2023 – Dec 2023

- Supported advisors in preparing daily market reports and client investment recommendations using fundamental and technical analysis of Vietnamese equities.
- Monitored price movements and trading signals for a watchlist of 20+ stocks; summarized key findings into structured briefings for senior advisors.

PERSONAL PROJECTS

VN30F1M Intraday Hedging System (R) 2026 – Present

- Developed an intraday backtesting and Grid Search optimization system for VN30F1M futures in R (data.table); analyzed strategy performance metrics by trading hour to identify optimal parameters.
- Built a real-time email alert pipeline using State Machine logic (WAIT_SHORT ↔ WAIT_OUT) and integrated SSI FastConnect API for automated order placement, cancellation, and position sync.
- Designed dynamic candlestick chart UI (echarts4r) to visualize entry/exit signals and strategy rules directly on price charts, exported as interactive HTML for trade tracking.

End-to-End Financial Analytics Pipeline – Securities Industry 2024 – 2025

- Scraped and extracted FVTPL/AFS portfolio data from 37+ listed securities firms via Python (Selenium, OCR); transformed and loaded into a PostgreSQL Star Schema warehouse for downstream analysis.
- Built a Power BI dashboard connected to PostgreSQL with multi-level drill-downs for portfolio comparison across firms; validated 100% data accuracy using automated sum-checks and LLM-assisted QA.
- Conducted cross-firm analysis of proprietary trading portfolio composition and risk exposure, surfacing insights on sector concentration and FVTPL/AFS allocation trends across the securities industry.

EDUCATION

Bachelor of Banking and Finance | Open University Ho Chi Minh City 2020 – 2024
